From Carlson:

It contains the fixes based on user input and crash submissions since we released 6.5.

In particular, the following features and crashes has been addressed or at least a fix has been attempted:

- 1) Crash on mouse move*
- 2) Crash on save (during exit?)*
- 3) Another update to image engine to correct problems in the last update*
- 4) Crash during printing or redraw after real time zoom*
- 5) Numerous “small” crashes*
- 6) Crashes during drawing opening or saving*
- 7) Right click menu is added for entity modifications (this requires menu reload and will reset the menus and toolbars). To reload the menu, type MENU and select icadbase.mnu file.*
- 8) Slow autosave/save has been addressed or at least improved.*
- 9) Font mapping problems have been addressed*

*In case if this patch makes matters worse for you, the older patch is available here:
