

New Monthly Webinars Announced!

I was able to nail down some dates and content for additional webinars here in early 2014.

I'm very excited to announce that **Donnie Stallings**, the original author of **SurvNet**, will be conducting a 2-part, 4-hour webinar for us on April 18th. From 10-12 Donnie will cover the basics of SurvNet and Least Squares analysis and then, from 1-3, he will go through project datasets **that I'm asking you to submit by email here**.

SurvNet can reduce multiple types of data (such as GPS, total station and level) at once, so please send us some good examples to use during the demonstration. I'm sure he won't be able to use all the data we receive but he'll go through a representative sample.

In addition, I'm happy to have **CAD Masters** doing a special presentation of their **CAD Standards Manager** product for us on March 26th. Based on questions I receive during my CAD Standards presentations at trade shows and training events, I believe you will really like what they have to show. Unlike the other webinars, this webinar is open to anyone who wants to attend – regardless of whether you have recently purchased software or hardware.

Here's the latest schedule – you can **Pre-Register for All Webinars Here**:

Tuesday February 11th 2014 at 12:00 pm ET – Overview of Surfaces

in Carlson

Monday March 10th 2014 at 3:00 pm ET – Introduction to Carlson

Monday March 17th 2014 at 2:00 pm ET – Introduction to Carlson
SurvCE & SurvPC (using SurvPC)
with **Jeremy Taylor PLS**

Monday March 26th 2014 at 12:00 pm ET – Introduction to **CAD Standards Manager** by **CAD Masters**
(this webinar is NOT limited to those who have previously purchased)

Monday April 14th 2014 at 3:00 pm ET – Annotation with CAD and Carlson

Friday April 18th 2014 from 10:00 – 12:00 ET – Overview of SurvNet Least Squares
with **Donnie Stallings PLS**

Friday April 18th 2014 from 1:00 – 3:00 ET – SurvNet Least Squares – Working with Project Datasets
with **Donnie Stallings PLS**

Additional classes covering Carlson Takeoff, Hydrology, Raw Data Editor, SurvCE Tips & Tricks and Point Clouds are scheduled and will be announced at a later date
