

So, How WILL We Buy CAD Software in 2016...?

Robert Green seems to have answers for everything – if you haven't subscribed to his CAD Manager Newsletter yet, you should!

Here, in How Will You Buy CAD Software in 2016?, he tackles Autodesk's move to a Subscription only (rental) distribution model and encourages everyone to prepare for the transition now.

The only quibble I'd have is with this quote:

It's important to note that this change will affect only those customers who already own perpetual licenses of standalone desktop software; it does not affect customers using Autodesk product suites or those already on a desktop subscription plan or using cloud services.

Anyone who has been through the Land Desktop transition to Civil 3d should understand that statement is probably best read with a big **YET** inserted at the end...
