

Carlson Software and Windows 10

Microsoft released the Windows 10 operating system for PCs this week and a lot of Carlson users have jumped to install the shiny (and free) new thing. I always recommend waiting a few weeks for kinks and bugs to be worked out before installing anything that affects all your program installations and can have such a big impact on your productivity.

However, I've heard from a lot of you who've already tried it out with Carlson 2015 and even earlier versions. Most have had success but some have called or emailed with questions. I reached out to Carlson's tech support to ask what Carlson users can expect with Windows 10 – this is the response I received:

We have tested Carlson 2016 on pre-release Windows 10 and did not see any issues in limited testing. We expect to have 2016 compatible with Windows 10 when it ships. We may address some minor issues with Carlson 2015 if they arise, but not older versions.

If you haven't renewed your maintenance plan or upgraded for awhile, now is really a good time. If you renew your maintenance now, before 2016 is released, you will get an immediate upgrade to 2015 and then will also receive the upgrade to 2016. Also, if your maintenance has expired, your cost to renew maintenance will increase once 2016 is released because you'll be an additional version behind.

Click [here](#) to request a proposal for new licenses, for upgrades or maintenance renewals and find out what other goodies That CAD Girl includes with your purchase.

Update: Carlson has now posted this to their website
