

Follow up: If You're Not Using LandXML, You Should Be... (yes, all of you!)

We had a great turnout for our LandXML webinar last week and I was excited to have Nathan Crews join us to wrap it up and put a bow-tie on my presentation! Nathan is the developer of LandXML and is the custodian of LandXML.org.

He joined us to explain some of the history of LandXML, give a preview of where LandXML 2.0 is going and also provide an update as to the organizations that are currently (and planning on) standardizing on LandXML.

As a primer, you can read this article from Machine Control Online last year. And, if you missed it, you can register below to watch the 9/17/2015 webinar:

First Name (required)

Last Name (required)

Company Name (required)

Your Email (required)

Would you like to be added to our mailing list? Yes ☐ No ☐

2015 That CAD Girl & Carlson Software Training Workshops

Can't believe we're ready to start registration for end-of-year workshops already! What happened to March...?!

We're really looking forward to seeing everyone again and I've gotten quite a few inquiries already wondering if and when and where we're holding events this year. As to the when and where, the list is below. We've really had a great turnout in the Asheville area for the 1/2 day sessions the past couple years so we're coming back for a full day this year.

Because we've had a good number of people want to attend both days in Statesville or Raleigh we've decided to restructure things a bit so that we don't repeat any major presentation over the two days we're in one location. That way you can attend both days if you need the credit or are just interested in the material. Although my CAD Tips & Tricks is listed both days in Statesville & Raleigh, I'll have a completely different presentation each day. The two days in Raleigh will mostly be a repeat of the two days in Statesville.

The registration fee for all events is \$99 but an early registration discount is in effect through 9/30 for the Hendersonville (Asheville area) & Statesville events and through 10/31 for Raleigh events.

As always, we'll have snacks and box lunches along

with software, hardware and maintenance renewal specials. And it's always fun seeing what we can convince Carlson to provide for giveaways at the end of the day!

See links below to register and to download the announcements for each event:

Hendersonville NC Workshop – Mon Nov 16th, 2015

If You're Not Using LandXML – You Should Be (yes, all of you!)

This is a badly needed webinar... I don't think I've done one specifically on this topic before and, for the life of me, I don't know why. For years I've been speaking to large groups at conferences and trade shows and it never ceases to amaze me how few people know the benefit of using LandXML files!

This will be a little different from my regularly scheduled webinars because it's FREE to everyone, there is no purchase required and the material presented will apply to everyone regardless of the civil/survey/construction software you use. Whether you know it or not, you've probably got everything you need already in your current software – you just need to put it to use.

So, what prompted me to finally schedule it? These poor people still using Land Desktop or Eagle Point calling me in a panic because their hard drives have finally crashed and they can't get the old software installed on newer Windows machines. Don't get me wrong, I don't fault anyone for hanging on to something that works but the ones who call me never realized they had the tools to protect themselves and salvage years of project data all along.

You can register here (no strings attached – promise!) or keep reading for the full announcement...

Please join me in this free webinar while I explain the

benefits of, and how to use, LandXML-formatted files to share and archive project-related data files regardless of the manufacturer or version of software you and other team members use.

Although many people do not realize it, LandXML is a tool that's most likely in your hands now and won't require any additional purchase.

This webinar is a MUST SEE for anyone still using Land Desktop, Eagle Point or other program that has been retired because it is increasingly difficult, if not impossible, to install these programs on newer computers.

The information provided in this webinar will apply equally to users of Carlson Software, Land Desktop, Civil 3d, TerraModel, Eagle Point and practically any other software for surveyors, engineers or contractors (including machine control systems).

=====

This webinar will last approximately 1 hour and there will be time for questions at the end.
