

Last call! Raleigh Workshops are next week!

Last chance to register for our workshops in Raleigh next week!

Tuesday is our Workshop for Carlson Surveyor and we have Dean Goodman (formerly of C & G Software) presenting an intensive 1/2-day of training on SurvNet Least Squares. Jeremy, Scott & I will be presenting other sessions on traverse adjustment, field to finish, stakeout tips & annotation.

Mark Long has our highlighted sessions on Wednesday in the Workshop for Engineers & Designers. Mark's sessions are free-flowing and interactive – he will be covering techniques in advanced roadway design in the morning and advanced hydrology in the afternoon. While Mark keeps everyone entertained in one room, the rest of us will be demonstrating various software tools for grading and design in Carlson Surveyor Software.

And, rumored but not confirmed... we may have another guest presenter showing up on Wednesday to demonstrate the latest in Carlson's Precision 3d products. Anyone who attended the first few workshops almost 10 years ago may know who I'm talking about!

NC licensed surveyors and engineers will receive 8 PDH credits per day. As always, the lunch will be grand and the giveaways spectacular!

Follow this link to learn more and register now!
