"IF YOU DON'T SHUT UP ABOUT HOW GOOD ZARCAD 8 IS WE WON'T BE GIVEN THE BRAND NAME VERSION"

Changes to Autodesk licensing and purchasing options seem to be coming like clockwork... and those options are becoming more and more limited!

So, Is IntelliCAD (and Carlson Software) the Answer to Your Pain And Suffering...?

Join us for our FREE webinar on Wednesday June 28th to hear Dave Lorenzo, President of the IntelliCAD Technology Consortium (ITC), explain the history and the future of IntelliCAD as well as Dave Carlson, Exec VP of Carlson Software, to describe the relationship between Carlson Software and IntelliCAD and explain the reasons that Carlson delivers on IntelliCAD.

Lastly, I will spend a few minutes in the IntelliCAD software showing the similarities (and differences) between it and AutoCAD and the features I believe will be of most interest to civil/survey/construction software users.
