

July 2020 Webinars with That CAD Girl

Don't miss our upcoming webinars in July. Current customers of That CAD Girl can attend for free or webinars are available for purchase. You can read more [here](#).

We're also happy to have you attend any webinar as a guest if you'd like to try before you buy – just email us [here](#) with your request.

Our webinars are live and interactive so you can ask questions and have them answered on the spot. You'll also receive a record of your attendance to submit for PDH or CEU credit!

July 7th – Intro to Carlson Software – Settings, Setup, Configuration & Points

July 9th – Overview of Carlson Point Cloud with Steve Cummings

July 14th – Site Grading Project from Start to Finish

July 15th – Down & Dirty Data Transfer with Carlson Software

July 28th – Sheet Setup with Paper Space, DView and UCS Rotation

Join us for a new “Overview of Carlson Point Cloud Software” webinar

I’m looking forward to having Steve Cummings of Carlson Software join us for this first time presentation of ***Overview of Carlson Point Cloud Software***.

This is part of our ongoing series of live, interactive webinars that are FREE to anyone who purchases software through That CAD Girl. If you are interested in attending this (or another) webinar as a guest to try it out – please email me here – or current customers can follow this link to pre-register.

Interested in reading up on Point Clouds a bit more? Check out our FAQ: P3D Topo? Or Point Cloud? Point Cloud Basic? Or Point Cloud Advanced...?

Please join us for this presentation by Steve Cummings of Carlson Software as he demonstrates some of the capabilities of Carlson’s Point Cloud software. Some of the topics that may be presented are: importing and converting state lidar to Carlson TIN files, photogrammetry and terrestrial point clouds to surfaces with some linework and advanced cavity scan. Steve will also explain the differences between Carlson’s Point Cloud Basic, Point Cloud Advanced and Precision 3D Topo programs.

This webinar will last approximately 1 hour and there will be time for questions at the end.

Steve Cummings works for Carlson Software and serves as the Photo Capture Product Manager, Photogrammetry and Terrestrial Scanner Specialist. He holds a Bachelor of Science in Industrial Management from the University of Wyoming.

Pick 3 Discount through 6/30/2020!

There are still a few days left to take advantage of our Pick 3 with Maintenance special! You'll need a special coupon code so, email us to get current pricing and make sure to register here for future newsletters to take advantage of other special offers.

Carlson Connect 2020 is available in the Autodesk App Store

If you are a current user of Autodesk Civil 3d but have to regularly convert data from Carlson Software applications, Carlson Connect may be the solution for you!

LandXML continues to be the best and most complete solution for transferring data files between Carlson and most other survey, design and construction programs but Carlson Connect may be a better fit for some of you. The program runs inside of Civil 3d and has versions that run with 2018, 2019 and 2020.

The program allows you to transfer point and raw data between Civil 3D and Carlson SurvCE data collection. You can also export Civil 3D surfaces and alignments to Carlson files.

Extended! Carlson Upgrade Promotions Available thru June 30, 2020

Missed Carlson's May specials? Never fear... they are now JUNE specials and have all been extended until 6/30/2020!

50% discount on renewals of expired maintenance – If your maintenance expired on or before 6/1/2019 you're eligible for this 50% discount. Renew now to receive an immediate upgrade to 2020 plus an upgrade to 2021 when it comes out later this summer.

35% discount on upgrades of Survey and Takeoff with embedded AutoCAD (OEM)

25% discount on upgrades of SurvCE and SurvPC

All renewals through That CAD Girl include access to our live and interactive webinars. Follow this link for our upcoming schedule.

Other specials are available through That CAD Girl for Pick 3 (use coupon "pick320" at checkout), 3 months of webinars and Swap! or Add! modules within your current license.

Just Announced! 50% discount to renew expired Carlson Software maintenance

On Thursday afternoon Carlson Software announced a limited time program allowing users with expired maintenance to renew at a 50% discount off regular price.

By renewing maintenance now, you'll receive an immediate upgrade to 2020 plus an upgrade to 2021 when it's released later this year. Current maintenance holders also receive free access to Carlson Academy that includes recordings and step-by-step tutorials for various programs.

If you're interested in taking advantage of this limited time special, email us today for a custom proposal!

Working Remotely with Your Carlson Software

These days, everyone is having to be creative in finding ways to work from home or other remote location.

For standalone licenses, Carlson Software's licensing agreement allows users to install on two computers for your personal use. You can see more in this FAQ: Can I install my Carlson desktop

software on two computers?

If you own network licenses, you have the ability to “check out” a license to a remote computer. See this FAQ: Working with Carlson’s network license manager for help.

Carlson’s support team is working remote and is fully operational if you run into any problems.

Stay safe out there!

On My Soapbox again! If You’re Not Using LandXML – You Should Be (yes, all of you!)

Missed our live webinar? Follow this link to view the recording

LandXML is one of those “universal” topics that applies to everyone, regardless of what software you use and whether your primary business is survey, design, engineering or construction.

You can register here for a FREE webinar during which I’ll explain the benefits of, and how to use, LandXML-formatted files to share and archive project-related data files.

With the retirement of Windows 7, more and more of us are making the move to Windows 10 and that often brings a lot of headaches trying to make sure that we are not only viable and productive going forward, but are also able to view and access project data from years past. **LandXML** can be a lifesaver! Regardless of the program you *currently use*, the one you *plan to use* or the one *other project team members use* – LandXML is the best option for sharing and archiving project data; better yet, it is a tool that's most likely in your hands now and won't require any additional purchase!

This webinar is a MUST SEE for anyone still using Land Desktop, Eagle Point, TerraModel or other program that has been retired because it is increasingly difficult, if not impossible, to install these programs on newer computers. The information provided will apply equally to users of Carlson Software, Land Desktop, Civil 3d, TerraModel, Eagle Point and practically any other software for surveyors, engineers or contractors (including machine control systems).

No purchase is necessary, you can register [here](#).

**Carlson's User Conference is
Going West! Get ready
Portland!**

I'm looking forward to joining other Carlson staff and trainers at this year's Go West Conference in Portland Oregon – it's a great opportunity to meet and greet some of my long-time west coast customers for the first time.

This year's conference will be held at the Sheraton Portland Airport Hotel from April 20-22. Dave Lorenzo from the ITC (IntelliCAD Technology Consortium) will be presenting the Keynote address on Monday night.

Need to Swap? Need to Add? More Limited Time Specials on Carlson Software

I'm not sure how long these options will be available but Carlson has (FINALLY!!) given me the OK to accept orders to **Swap!** modules in or out of existing software bundles and to **Add!** more modules to existing licenses. This is a test run so let's see how it goes!

The option to **Swap!** a module out of a bundle for another one has been sorely needed and most requested by those who have previously purchased Civil Suite but find they don't use one of the modules very often.

Now, for only \$500 you can swap one or more modules for any of the programs that are included in Carlson's Select Suite: Survey, Civil, GIS, Hydrology, CadNet or Point Cloud Basic.

Until now, if you own one or more modules and wanted to simply add one more program to the bundle, your only option was to pay full price for the new program.

Now, again for a limited time, you can **Add!** any of the modules

in the Select Suite for only \$750. The programs available for this promotion are: Survey, Civil, GIS, Hydrology, CadNet or Point Cloud Basic.

The fine print: You must have an active maintenance plan to take advantage of this offer.

If you want to **Swap!** or **Add!** modules please email me to request a custom proposal.

Earlier in 2019 Carlson introduced the new line of Select Suite bundles which gives users the option to create your own bundle with only the modules you need so the need to **Swap!** won't be as important to us at some point. If you need to add a whole new license, [click here](#) to see our current pricing on Select Suite bundles of 2, 3, 4, 5 and 6 modules!
