Features and Benefits of Point Cloud 2019

With the release of their 2019 products, Carlson now offers Basic and Advanced versions of their Point Cloud program.

Comparison: Point Cloud Basic vs Point Cloud Advanced

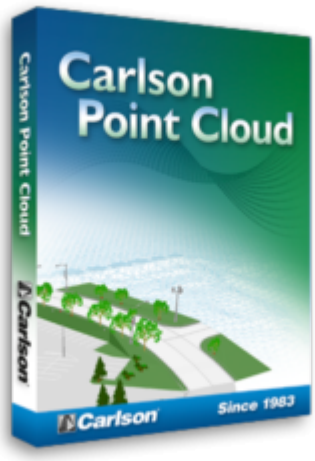
Commands in Point Cloud Basic and Point Cloud Advanced

Carlson Point Cloud is a modular program that provides this powerful ability to go from field scan to finished plat, all

with seamless integration to Carlson Survey, Carlson Civil and Carlson Mining. **Carlson Point Cloud** delivers a whole new level of powerful automation for large data sets. It gives laser scanner users the ability to process millions of data points with Carlson Software ease-of-use.

Register your scan to local coordinates, filter or decimate the points, overlay raster images in 3D, snap to edges and code the descriptions for automated field-to finish processing of linework and symbols and create contours, profiles, sections, and breaklines. You will be able to read scan data from many instruments, view and process up to 1 billion points, and then perform the Field-to-Finish from the scanned data!

This Carlson Software office product allows users to export surface models, points, contours, breaklines, grid and profiles



to CAD.
