Overview of Carlson CADnet

A Virtual Webinar Using Carlson CADnet – Learn to Convert PDFs and Scanned Plans to Linework

This Carlson CADnet webinar shows how to bring PDFs and scanned plans into CAD and turn them into usable line work. The session covers saving PDFs as TIFF images, scaling an image to real-world distances, heads-up digitizing of contours, building pads and spot elevations, merging plan sheets along match lines, comparing raster and vector PDFs and importing an architectural IFC (BIM) model and moving it to finished floor elevation.

Key Topics:

- Importing a PDF in CADnet and saving it as a TIFF image to insert as a raster image
- Scaling an image to real-world units with the Scale command’s Reference option and a graphic scale
- Heads-up digitizing of contours, building pads and spot elevations
- Merging raster plan sheets along match lines with Merge Raster Files and control points
- Vectorizing raster and vector PDFs into line work and cleaning it up
- Importing architectural IFC (BIM) files and moving the model to finished floor elevation

This session was presented by Jennifer DiBona on 01/14/2016.

Taking a Survey Project from Field to Plotted Sheet

A Virtual Webinar Using Carlson Survey – Learn Field to Plotted Sheet Workflows

This webinar walks through the full process of managing a Carlson Survey project—from importing field data and establishing control points to building surfaces, writing legal descriptions and finalizing a plotted drawing. It provides a practical, command-level overview for surveyors seeking efficient project setup, data import and sheet production techniques in Carlson Survey.

Key Topics:

- Carlson Survey setup and configuration
- Importing field data and establishing control points
- Creating and adjusting points and drawings
- Deed files and legal descriptions
- Field-to-Finish automation and surface modeling
- Finalizing a plotted drawing

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 01/12/2016.

Intro to Carlson Software: Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn Carlson settings setup and points

This recorded webinar provides a detailed introduction to Carlson Software for new users, covering program configuration, default settings, project folder structures, drawing setup, point management and best practices for efficient CAD workflows. It also outlines how to access updates, customize templates and maintain consistent setup across projects.

Key Topics:

- Carlson Software configuration and setup
- Managing builds, updates and patches
- Setting default folders and project structures
- Drawing setup and scale management
- Point creation, import, editing and display customization
- Using IntelliCAD vs. AutoCAD environments

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 01/05/2016.

Grading Tips & Tricks

A Virtual Webinar Using Carlson Software – Learn Grading Tips and Tricks

This webinar provides hands-on grading tips and workflow efficiencies using Carlson Survey, Civil, Takeoff and Construction. It covers image importing, surface generation, pad design and useful commands for accurate terrain modeling and grading optimization in Carlson Software.

Key Topics:

- Building rough base maps using GIS imagery and elevation d ata
- Creating, clipping and merging terrain surfaces (TINs)
- Design Pad Template and balancing cut/fill calculations
- Generating contours, slope reports and color maps
- Elevating and labeling 3D polylines and building pads

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 12/09/2015.

Roadway Design with Carlson RoadNet

A Virtual Webinar Using Carlson RoadNet – Learn roadway design basics

This webinar provides a complete, step-by-step walkthrough of roadway design using Carlson RoadNet, covering surface creation, alignment and profile design, intersection management, cul-de-sacs and building-pad elevation. Attendees learn essential configuration, workflow and data-management practices that link linework with triangulated surfaces for efficient civil-site and subdivision design.

Key Topics:

- Carlson RoadNet configuration & object linking
- Surface creation from contours and triangulation
- Designing centerlines, profiles and templates
- Managing intersections, cul-de-sacs and networks
- Adding turn lanes via Template Point Centerlines
- Elevating building pads and lot lines using grading rules

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 12/08/2015.

Carlson Survey – Tips & Tricks

A Virtual Webinar Using Carlson Survey – Learn survey productivity tips

This recorded webinar from That CAD Girl covers powerful tips and tricks for using Carlson Survey, with demonstrations of commands shared across Carlson's civil and construction software lineup. Topics include data importing, surface modeling, field-to-finish workflows, profile generation and Google Earth integration.

Key Topics:

- Configuring Carlson Survey and enabling object linking
- Using Search Published Control and exporting to Google Earth
- Building and merging surfaces, shrink wrap entities and setting non-surface points
- Importing NED elevation data
- Generating profiles for roads, sewers and utility crossings
- Drawing, annotating and inspecting profiles

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 12/03/2015.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn setup configuration and points

This training webinar introduces new users to Carlson Software, focusing on configuration, project setup, drawing tools and point management. Participants learn how to establish consistent settings across projects, customize templates, manage coordinate files and apply best practices for field-to-finish workflows.

Key Topics:

- Carlson Software configuration and setup
- Project folder management methods
- Drawing and point file settings
- Layer templates and drawing scales
- Point attribute and symbol customization
- Tips for maintaining consistency across installations

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 12/01/2015.

Intro to Carlson Surfaces, Centerlines and Profiles

A Virtual Webinar Using Carlson Software – Learn surfaces centerlines and profiles

This webinar provides a step-by-step introduction to building surfaces, defining centerlines and creating profiles within Carlson Civil and Survey. It walks through key tools such as Shrinkwrap Entities, Triangulate & Contour, breaklines and object linking for effective design and modeling workflows.

Key Topics:

- Surface modeling fundamentals in Carlson Civil and Survey
- Using Shrinkwrap Entities and triangulation best practices
- Centerline creation, linking and stationing
- Generating and editing surface profiles and contours

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 11/11/2015.

Overview of Carlson GIS

A Virtual Webinar Using Carlson GIS – Learn shapefile attribute workflows

This webinar provides a comprehensive introduction to Carlson GIS, demonstrating how Carlson's GIS module integrates with Carlson Survey and CAD workflows to manage, query and visualize spatial data. It walks attendees through shapefile imports, GIS database setup, attribute linking and using images and map services for real-world projects.

Key Topics:

- Difference between Carlson Survey GIS menu and Carlson GIS module
- Working with shapefiles (SHP, SHX, DBF and projection files)
- Defining features and attributes
- Using GIS Inspector to view and edit data
- Connecting to Esri ArcGIS and Web Map Service imagery
- Building GIS databases from CAD entities and Excel data

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 11/10/2015.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn setup configuration and points

This webinar introduces new users to Carlson Software, focusing on configuration, default settings and practical use of points in CAD workflows. It walks through general settings, folder setup, drawing templates, point management and troubleshooting for efficient use.

Key Topics:

- Carlson Software configuration and settings customization
- Project and data folder structuring
- Drawing setup and template use
- Point management, scaling and layout customization
- Using Carlson’s drawing tools effectively

Descriptions, transcripts and other details of this recording ha ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 11/05/2015.
