

The Very Basics of Carlson Field to Finish Recorded 2/11/2020

This webinar introduces the foundational concepts of Carlson's Field to Finish feature, demonstrating how to set up field code files, manage point data, and automate the creation of symbols and linework in CAD drawings. Attendees learn how to configure FLD files, use special codes, and control point display layers for efficient survey data processing.

Key Topics:

- Overview of Field to Finish in Carlson Survey
- Creating and managing FLD (field code) files
- Point creation, attributes, and symbol management
- Layer control and attribute separation
- Use of special codes and description handling

This session was presented by Jennifer DiBona on 02/11/2020.

Taking a Survey Project from Field to Plotted Sheet

This webinar walks through the complete workflow of taking a survey project from raw field data to a finished plotted sheet using

g Carlson Survey. It covers importing points, managing coordinate files, deed entry, field-to-finish automation, surface generation, and final sheet layout for professional deliverables.

Key Topics:

- Importing and managing survey points and coordinate files
- Entering and processing deed descriptions
- Using field-to-finish for automated drafting
- Building surfaces and contours
- Creating legends, title blocks, and final plot sheets

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 01/21/2020.

More Surfaces, Volumes Editing and Display Tips & Tricks Recorded on 3/24/2020

This webinar from That CAD Girl provides an in-depth demonstration of Carlson Civil's surface and volume modeling tools. It covers practical workflows for viewing, editing, merging, and analyzing TIN files, as well as tips for grading, slope analysis, and cut/fill reporting.

Key Topics:

- Working with Carlson TIN (triangulation) files
- Surface viewing, editing, and boundary management

- Creating and comparing surfaces for grading and volume calculations
- Importing data from the National Elevation Dataset (NED)
- Cut/fill analysis, slope reporting, and LandXML export

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 03/24/2020.

Introduction to Carlson Software-Settings, Setup, Configuration & Points Recorded 11/2/2020

This webinar introduces new and existing users to Carlson Software's desktop environment, focusing on configuration, settings management, and point handling. It covers interface customization, project folder structures, templates, and best practices for managing data and drawing standards.

Key Topics:

- Carlson Software user interface and configuration
- Project and data folder setup
- Drawing templates and settings files
- Managing and editing points (CRD files)
- Linking data, scaling, and annotation standards

Descriptions, transcripts and other details of this recording have

ve been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 11/02/2020.

Introduction to Carlson Software-Settings, Setup, Configuration & Points Recorded 10/7/2020

This webinar provides a comprehensive introduction to Carlson Software, focusing on configuration, settings management, and point data handling. Participants learn how to set up projects, manage templates, configure defaults, and work efficiently with Carlson's survey and civil design tools.

Key Topics:

- Carlson Software interface and configuration
- Setting up projects, data, and settings folders
- Creating and using templates (DWT files)
- Managing points, CRD files, and drawing setup
- Understanding scales, symbols, and annotation standards

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 10/07/2020.

Introduction to Carlson Software-Settings, Setup, Configuration & Points Recorded 9/2/2020

This introductory webinar walks new Carlson Software users through essential setup and configuration steps, including interface customization, project folder management, template creation, and point handling. It provides practical guidance on organizing data, defining defaults, and using Carlson's drawing and coordinate tools efficiently.

Key Topics:

- Carlson Software interface and configuration basics
- Project and data folder setup
- Drawing templates and default settings
- Point file management and import/export
- Troubleshooting and technical support tips

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 09/02/2020.

Introduction to Carlson Software-Settings, Setup, Configuration & Points Recorded 7/7/2020

This webinar provides a comprehensive introduction to Carlson Software's desktop environment, focusing on configuration, default settings, data management, and point handling. It walks users through setting up projects, customizing templates, managing coordinate files, and understanding how Carlson links data between drawings and external files.

Key Topics:

- Carlson Software interface and menu structure
- Configuration of default settings and data folders
- Drawing setup, templates, and annotation scaling
- Managing coordinate (CRD) files and point data
- Linking data files and troubleshooting builds

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 07/07/2020.

Introduction to Carlson

Software-Settings, Setup, Configuration & Points Recorded 6/3/2020

This webinar introduces new and intermediate Carlson Software users to essential configuration settings, project setup methods, and point management workflows. It covers how to standardize templates, manage data and settings files, and ensure efficient project organization within Carlson's environment.

Key Topics:

- Carlson Configure and Drawing Setup
- Project and Data Folder Management
- Template Creation and Customization
- Point File Importing and Editing
- Start Page and Drawing Map Features

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 06/03/2020.

Introduction to Carlson Software-Settings, Setup,

Configuration & Point Recorded 5/4/2020

This webinar introduces new users to Carlson Software, focusing on configuring system settings, managing project folders, and setting up points within drawings. Participants learn best practices for maintaining consistent configurations, organizing data, and customizing drawing defaults for efficient CAD workflows.

Key Topics:

- Carlson Configure and general settings management
- Project and data folder organization methods
- Drawing setup defaults (scales, symbols, text)
- Importing and displaying points
- Saving and sharing configuration files

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 05/04/2020.

Introduction to Carlson Software-Settings, Setup, Configuration & Points

Recorded on 4/2/2020

This introductory Carlson Software webinar walks new users through essential configuration steps, default settings, and point management in Carlson Survey and related modules. It explains how to organize projects, manage data folders, update builds, and customize drawing templates for efficient CAD workflows.

Key Topics:

- Carlson Software configuration and default settings
- Project and data folder organization methods
- Drawing templates, scales, and point display management

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 04/02/2020.
