

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn Intro to Carlson webinar setup for points and configuration

This recorded webinar introduces new users to Carlson Software, providing a walkthrough of configuration, setup, template management, and point handling tools. It focuses on helping surveyors, engineers, and CAD technicians establish reliable defaults and workflows for Carlson Survey or Civil applications.

Key Topics:

- Carlson Configure & General Settings
- Project and Data Folder Structure (Drawing Folder vs Project Folder Method)
- Drawing Templates and Layer Standards
- Importing and Drawing Points (CRD Files)
- Annotation, Scaling, and Symbol Settings
- Managing Point Data, Text Styles, and 2D Line Commands
- Quick Keys and Drafting Shortcuts

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 07/06/2017.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn Carlson Software setup webinar workflows

This introductory webinar provided new users a comprehensive tour of Carlson Software's setup, configuration options, and system management tools. Topics included technical support, drawing/template setup, project and data folder organization, and key CAD principles for working efficiently in Carlson.

Key Topics:

- Carlson installation setup and technical support
- Project and data folder configuration
- Drawing defaults, templates, and scaling logic
- Managing coordinate files and point data (CRD files)
- Practical CAD tools in Carlson IntelliCAD

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 03/01/2017.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn Carlson Setup Webinar Workflows for Points and Projects

This beginner-friendly webinar introduces participants to the foundational setup and configuration of Carlson Software, including how to manage technical support, builds, drawing templates, and point settings. Hosted by That CAD Girl, it offers real-world guidance for configuring an efficient working environment and establishing repeatable standards.

Key Topics:

- Carlson configuration and user support setup
- Drawing and project folder management methods
- Build version control and bug troubleshooting
- Point display, annotation scaling, and template creation
- Creating and managing Carlson configuration (.CFG) files

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 11/01/2017.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn Carlson Software setup webinar workflows for points and configuration

This introductory Carlson Software webinar provides a step-by-step walkthrough of key configuration, setup, and project management practices. Attendees learn how to establish Carlson defaults, manage project folders, templates, and points, and optimize workflows for accuracy and efficiency.

Key Topics:

- Carlson configuration and setup fundamentals
- Project and data folder organization
- Drawing setup and annotation standards
- Points management, display, and scaling
- Working with templates and linework

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 06/01/2017.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn setup, configuration, and point workflows in an Intro to Carlson webinar

This introductory webinar provides new and returning Carlson Software users with a structured walkthrough of essential setup, configuration, and workflow steps in the Carlson desktop environment. The session covers configuration management, data-folder organization, drawing setup, point display, templates, and practical tips for maintaining consistency and efficiency across projects.

Key Topics:

- Carlson Configure fundamentals (General Settings, Project & Data Folders, Drawing Setup)
- Organizing and linking project files (.CRD, .TIN, .DWG)
- Understanding drawing templates and the National CAD Standard (NCS) layers
- Importing and displaying points; managing scales and attri

bute layouts

- Saving and restoring configuration files (.CFG)
- Clarifying version and build maintenance (2017 vs 2018)

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 10/03/2017.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn Carlson setup and point annotation workflows

This recorded webinar by That CAD Girl provides an in-depth introduction to Carlson Software, including installation configuration, data folder management, use of templates, annotation scaling, and practical CAD workflow tips for survey and civil users.

Attendees learn how to set up drawing defaults, manage point files, adjust annotation sizes consistently, and apply Carlson's field-to-finish tools effectively.

Key Topics:

- Carlson program configuration and default settings
- Project and data folder structures (Drawing vs Project folders)
- Template (DWT) setup and customization
- Annotation scaling logic: height × scale = plotted size
- Managing point files (CRD) and field-to-finish workflow
- Drawing setup for scales, text, and symbols
- Quick Keys, snap options, and best practices in 2D vs 3D drafting

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 01/31/2017.

GIS Data Collection for Surveyors by Jeremy Taylor PLS

A Virtual Webinar Using Carlson SurvCE and SurvPC – Learn Carlson GIS Data Collection Webinar Workflows

This training webinar demonstrates how surveyors can collect, manage, and exchange GIS data with municipalities using Carlson SurvCE and SurvPC. The session walks through exporting Esri data, importing it into Carlson software, collecting attributes in the field, and linking GIS features to CAD drawings.

Key Topics:

- Esri GIS data export and CAD integration
- Field data collection using SurvCE/SurvPC
- Creating and managing GIS attributes
- Using CRDB, VTT, and related Carlson file types
- Bringing field attribute data back into Carlson Survey

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 04/05/2017.

Field to Finish with Doug Aaberg, PLS

A Virtual Webinar Using Carlson Software – Learn Carlson Survey point staking webinar workflows

This recorded webinar features Carlson Software's Doug Aaberg demonstrating the complete setup and workflow of the *Field to Finish* process within Carlson Survey. The session teaches how to configure code tables, manage attributes and layers, and automate CAD drafting directly from field data collection.

Key Topics:

- Introduction to Carlson's Field to Finish workflow
- Setting up and editing Field Code Tables (FLD files)
- Attributes vs. text-based labeling workflows
- Layer management best practices
- Using templates for efficiency (e.g., curbs, ramps, trees)
- Incorporating special codes and GIS attributes
- Managing survey points, breaklines, and automated surface modeling

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Doug Aaberg on 08/15/2017.

Working with Carlson Hydrology Drafting Pipes and Structures

A Virtual Webinar Using Carlson Software – Learn Carlson Hydrology Storm Sewer Drafting for Pipes and Structures

This webinar introduces the foundational drafting tools and network-design capabilities in Carlson Hydrology. It covers setup, surface integration, centerlines, profiles, sewer network creation, and labeling workflows essential for building storm

and sanitary systems.

Key Topics:

- Carlson Hydrology drafting fundamentals
- Working with surfaces, profiles, and centerlines
- Sewer network setup, pipes, and structures
- Drawing and labeling hydrology elements
- Integration with Carlson Civil

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 04/13/2017.

Working with Carlson Hydrology Drafting Pipes and Structures

A Virtual Webinar Using Carlson Hydrology – Learn storm sewer drafting for pipes and structures

This webinar introduces the process of drafting pipes and structures using Carlson Hydrology and related Civil tools. It covers creating sewer networks, profiles, and surface interactions for accurate drainage and utility design workflows.

Key Topics:

- Profile creation and labeling in Carlson Civil and Hydrology
- Drawing sewer networks and stormwater systems
- Drafting profiles, structures, and pipes for design documentation

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 12/19/2017.
