

# Fast Track to Carlson Civil Suite and CADnet – Session #2-2

## Recorded 5/25/2023

This training session continues the *Fast Track to Carlson Civil Suite* series, focusing on creating and managing centerlines, profiles, and road networks using Carlson Civil and CADnet. Participants learn how to manually build alignments, profiles, and templates before automating workflows with Carlson's Road Network tools.

### Key Topics:

- Creating and managing centerlines and profiles
- Using Carlson configuration and project folder structures
- Building and editing road templates and networks
- Generating surfaces, cross sections, and earthwork volumes

# Fast Track to Carlson Civil Suite and CADnet – Session

# #2-1

## Recorded 5/25/23

This training session provides an in-depth walkthrough of Carlson Civil Suite and CADnet tools, focusing on site grading, surface modeling, and the SiteNet module for quantity takeoff and surface management. Participants learned how to model proposed grading, manage surfaces, calculate volumes, and create subgrade and topsoil reports using Carlson Civil's advanced features.

### Key Topics:

- Site grading and 3D polyline modeling
- Surface creation and volume calculations
- Carlson Civil vs. Carlson Survey functionality
- SiteNet setup, layer management, and material quantity reporting
- Topsoil removal and replacement workflows

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.
