

Overview of Carlson Takeoff

A Virtual Webinar Using Carlson Takeoff – Learn Carlson Takeoff Estimating Webinar Workflows for Site Quantities

This webinar provides a detailed walkthrough of Carlson Takeoff, covering its core functions in cut/fill estimation, subgrade modeling, trench calculations, geotechnical data integration, and handling of CAD/PDF drawings. Todd Carlson demonstrates real-world workflows for contractors and estimators, from data preparation to volume reports and 3D visualization.

Key Topics:

- Introduction to Carlson Takeoff Suite and modules
- Setting up boundaries, layers, and surfaces
- Cut/fill and subgrade calculations
- Integrating borehole and strata data
- Working with CAD and PDF plans
- Trench design, cost, and quantity reporting
