

Overview of Paper Space

A Virtual Webinar Using CAD – Learn to Set Up Paper Space

This webinar from That CAD Girl provides an in-depth walkthrough of paper space in CAD software. It teaches users how to set up layout tabs, create and manage viewports, set scale, and handle plotting configurations for professional-grade drawings.

Key Topics:

- Understanding model space vs. paper space
- Creating and managing layout tabs and borders
- Working with viewports and plot scales
- Controlling visibility and layers per viewport
- Change Space command and layout management

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 06/19/2019.

Overview of Carlson CADNet – Working with Images – Converting to Linework

A Virtual Webinar Using Carlson Software – Learn to Build Surface Models

This webinar provides a detailed walkthrough of Carlson CAD Net's capabilities for converting and managing raster and vector files, digitizing scanned drawings, merging multiple plan sheets, and importing/exporting BIM data. It shows how to efficiently transform PDFs and images into editable CAD linework for construction takeoffs and modeling.

Key Topics:

- Converting raster and vector PDFs to CAD linework

- Scaling and merging raster images and plan sheets
- Digitizing contours and features for takeoff and site modeling
- Understanding raster vs. vector data differences
- Cleaning and vectorizing images for surface modeling

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 05/16/2019.

Surface Modeling with the SiteNet _ Takeoff Menus in Civil, Construction & Takeoff

A Virtual Webinar Using Carlson Software – Learn to Build Surface Models

This detailed webinar explains how to use Carlson Software's SiteNet and Takeoff menus for layer-based surface modeling, material quantity takeoff, and topsoil management. It walks users through setting up drawings, defining layers, creating surfaces, and running reports for excavation, paving, and

earthwork calculations.

Key Topics:

- Carlson Civil/Construction SiteNet and Takeoff menus
- Defining layers and surfaces (Existing vs. Design)
- Quantities and subgrades for earthwork, curb, pavement, and topsoil replacement

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 05/15/2019.

Overview of SurvNet Least Squares with Doug Aaberg of Carlson Software

A Virtual Webinar Using Carlson Software – Learn to Analyze Survey Networks

In this Carlson Software webinar, Doug Aaberg demonstrates the enhanced SurvNet Least Squares adjustment tool for Carlson 2020, detailing its updated interface, best practices for survey dataprocessing, and the mathematical principles behind least

squares. The session also covers project settings, error handling, integrating GPS/vector data, and practical field-to-office coordination for better survey network accuracy.

Key Topics:

- Carlson SurvNet 2020 interface updates and workflow improvements
- Least Squares adjustment principles and network redundancy
- Integrating GPS vector data with traditional traverse data
- Error weighting, chi-square testing, and blunder detection
- Practical examples and hands-on training previews

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Doug Aaberg on 10/16/2019.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Configure Settings, Setup

and Points

This webinar introduces new and existing users to Carlson Software's setup fundamentals—focusing on configuration management, default drawing settings, and point handling. Attendees learn to streamline project organization, default settings, and coordinate-file management to build efficient CAD workflows.

Key Topics:

- Carlson Software default settings and configuration workflow
- Managing coordinate (CRD) files and linking with drawings
- Project folder structures and data management
- Working with drawing templates and point display options

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 09/04/2019.

Introduction to Carlson Software-Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Learn to Configure Settings and Points

This introductory Carlson Software webinar walks new users through default settings, configuration management, and point setup in Carlson. Participants learn how to control project data folders, manage drawing templates, and create consistent settings across projects.

Key Topics:

- Carlson Configure and Default Settings
- Project and Data Folder Methods
- Drawing Setup, Scales, and Point Configuration

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 03/04/2019.

Introduction to Carlson Software-Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Configure Settings, Setup and Points

This training webinar introduces new Carlson Software users to the essential configuration tools for managing defaults, projects, data folders, and drawing settings in programs like Survey and Civil. Participants learn how to customize templates, configure system settings, and streamline workflows for consistent CAD and survey setups.

Key Topics:

- Default settings and configuration in Carlson Software
- Project and data folder organization (fixed, drawing, and project methods)
- Drawing setup, templates, and scaling principles
- Linking data files (CRD, CL, TIN, PRO) and maintaining consistency
- Saving and sharing configuration profiles (CFG files)

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 11/06/2019.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Configure Settings, Setup and Points

This Carlson Software setup webinar helps users configure settings, organize project files, manage templates, and work with points more efficiently. This webinar introduces new Carlson Software users to key setup and configuration concepts, including settings management, project folder organization, and default drawing controls. Participants learn how to customize Carlson's configuration files, manage data paths, and properly set up points, layers, and templates for efficient project workflows.

Key Topics:

- Carlson Configure settings, data folders, and drawing setup
- Object linking and file management between DWG and CRD files
- Templates (DWT), drawing scales, and point symbol configuration

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 08/01/2019.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Configure Settings, Setup and Points

This Carlson Software setup webinar helps users configure settings, organize project files, manage templates, and work with points more efficiently. This instructional webinar introduces new Carlson Software users to foundational setup procedures, configuration options, and key defaults for points, drawing templates, and project organization. It provides a guided walkthrough of Carlson Configure settings, folder structures, and the use of templates to ensure consistent drawing environments.

Key Topics:

- Carlson Configure: General Settings, Project/Data Folders, Drawing Setup
- Managing configuration builds and software updates
- Project Folder vs Drawing Folder methods
- Working with templates and default layers

- Point settings, symbol sizes, text layouts, and styles

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 07/01/2019.

Introduction to Carlson Software – Settings, Setup, Configuration & Points

A Virtual Webinar Using Carlson Software – Configure Settings, Setup and Points

This instructional webinar introduces new users to Carlson Software's core configuration process, explaining how to manage settings, templates, folders, and point data. It covers default drawings, data links, project organization, and practical steps for setting up and displaying survey points effectively.

Key Topics:

- Carlson Software configuration and setup fundamentals
- Project and data folder methods (fixed, drawing, and project folders)

- Template drawings and file management
- Importing and displaying points (CRD files, text formats, scaling)
- Adjusting drawing scale, symbols, text, and fonts

Descriptions, transcripts and other details of this recording have been AI-generated and may contain errors.

This session was presented by Jennifer DiBona on 06/03/2019.
