Surface Modeling in Carlson Software
with Jennifer DiBona

This 2-day virtual training class will teach you the very basics of surface modeling for existing surfaces and progress to proposed road and site grading techniques. Our planned topics are:

- Tips and techniques to create accurate existing ground surface models
- Using Carlson Civil for roadway design
- Using Carlson Software for proposed site grading
- Using SiteNet or Takeoff for model building and calculating quantities
- Techniques for grading "problem areas" such as multi-level building pads, basements, handicap ramps and retaining walls
